

Telling Species Stories: Visualizing Futures for North American Habitat Dioramas

Habitat dioramas have been the subject of critiques that challenge the diorama's staged visions and the separation, behind panes of glass, of ourselves from nature. The species and habitats depicted are out of sync with the effects of climate change. However, these remarkable dioramas have enduring qualities that can further serve to educate and empower the public.

ALL WE NEED ARE NEW STORIES, AND THE CAPACITY TO VISUALIZE THEM...

OCTOBER, 09
1:00PM - 5:30PM

AT THE AMERICAN
MUSEUM OF
NATURAL HISTORY,
IN NEW YORK CITY

This workshop will focus on collaborative and co-creative exercises to develop these science-supported “stories” for three to five selected habitat dioramas.
