

URBAN WILDLIFE

WEEK IN LA:

CELEBRATING

10 YEARS OF THE

P-22 DAY FESTIVAL

URBAN WILDLIFE WEEK IN LA:

Visiting the
Wallis Annenberg
Wildlife Crossing
at Liberty Canyon!

HIGHLIGHTS →

Construction is currently underway! Once complete, the Wallis Annenberg Wildlife Crossing will be the largest wildlife crossing in the world, helping to restore habitats and ecosystems that have been fragmented by human development.

In 2019, EDL, as a partner of ARC Solutions, was invited by Beth Pratt, Regional Executive Director of the National Wildlife Federation, to lead a professional CoLab design workshop. The Liberty Canyon CoLab focused on reviewing and responding to the design-in-progress for what was then known as the Highway 101 Wildlife Crossing Project at Liberty Canyon.

The Wallis Annenberg Wildlife Crossing will allow animals to safely cross the 101 Freeway, reconnect fragmented habitats, reduce wildlife-vehicle collisions, and support healthy populations by enabling movement and genetic exchange across the Santa Monica Mountains.

Last week, EDL Lab Manager Sabrina represented EDL during LA's Urban Wildlife Week. During her visit, she had the chance to drive under and see the Wallis Annenberg Wildlife Crossing for the first time!
